

Organisation: Notre Dame School
Setting: Independant Catholic Day School for Girls Aged 2-18
Author: Amanda Windibank, Assistant Head (Pastoral)
Region: South East

The Challenge

Notre Dame School caters for over 420 students in the Senior School and Sixth Form. Although being a Catholic founded school, they welcome students of all backgrounds, regardless of faith.

They previously relied on paper-based files and were anxious about the risk of human error. They needed a centralised, evidence-based system to enable them to identify and focus training on specific student needs.

"Our approach is 'happy and successful – in that order' we needed a system that would demonstrate the need and impact of our interventions."

The Solution - MyConcern

"I wanted peace of mind that staff were recording things properly, I also wanted to give staff peace of mind that their concerns had been received."

After hearing about a Governor's proven success with MyConcern, Notre Dame School decided to look into the system. The school preferred MyConcern in comparison to other systems, as it has been created by child protection professionals.

"I really like the fact that MyConcern has been created by former Senior Police Officers, it gives it real gravitas!"

Implementing MyConcern

"MyConcern has saved me HOURS and given me confidence that our recording systems are much more robust. I can't recommend it highly enough!"

Notre Dame School are now confident that staff are recording concerns accurately and effectively and useful prompts ensure no vital information is missed.

Having everything hosted in one place, including data from SIMS such as SEN, attendance and mental health, has streamlined the processes in the school. It is even easier for staff to record concerns, as they can do this online on their computer or even via the mobile app, without having to locate keys to access to the filing cabinet.

Powerful reports can be created at the click of a button, saving Notre Dame School valuable time and enabling them to create impact and improve outcomes for their students.

"MyConcern is well worth the investment! It is extremely cost effective and I believe it has actually reduced cost in terms of staff time."

The Outcomes

"The safeguarding support including webinars, resources and up-to-date serious case reviews are the best support I have ever had as a DSL."

- Time savings
- Robust system gives peace of mind to teaching staff and Safeguarding Leads
- Staff can quickly and accurately record concerns
- Resources section keeps staff updated on local and national guidance and policies
- Document sign off enables easy tracking and auditing of staff who have read required documents
- Powerful reports keep Governors up to date
- Trends are easy to identify and the PSHE programme can be tailored to meet students' exact needs
- Communication is easier and more secure

"MyConcern has changed my life - I love it!"
